-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 5, 2004 has been entered.

Allowable Subject Matter

2. Claims 1-4, 6-11, 19 and 26-33 are allowed.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 20 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over the patent to Jarman et al ('184).

Col. 4, lines 3-12 and Figures 1 and 3a of the Jarman et al patent disclose a receiving beam forming apparatus that repeatedly samples echo signals. Specifically, it

is stated that the "fixed beam... can therefore be formed by sampling at the scan frequency, the detected received sonar signals, during a sampling period which is synchronized with the scanning frequency". Further, on col. 2, lines 11-27, it is stated that "successive scans relate to progressively increasing ranges ...".

The obviousness rejection is based upon a reading, by one of ordinary skill in the art, of specific structure from the Jarman et al patent upon the limitations in claims 20 and 34. Specifically, the above noted "successive scans" would functionally relate to the claimed limitation of "multiple scanning cycles", and the "sampling period being synchronized with the scanning frequency" would functionally relate to the claimed "scanning cycle being dependent upon the scanning frequency".

Response to Arguments

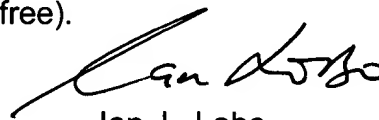

5. Applicant's arguments filed January 5, 2004 have been fully considered but they are not persuasive. Specifically, as shown above, the broad language of claims 20 and 34 may be found from functionally similar language in the Jarman et al patent.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ian J. Lobo whose telephone number is (703) 306-4161. The examiner can normally be reached on Monday - Friday, 6:30 - 3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas H. Tarcza can be reached on (703) 306-4171. The fax phone

number for the organization where this application or proceeding is assigned is 703-872-9306.
